With Security Center, you can apply security policies across your workloads, limit your exposure to threats, and detect and respond to attacks.. The Security Center - Overview provides a quick view into the security posture of your Azure and non-Azure workloads, enabling you to discover and assess the security of your workloads and to identify and mitigate risk.

Centralized policy management The Policy & compliance section (shown above) provides quick information on your subscription coverage, policy compliance, and security posture.. Selecting a tab (Not covered, Basic coverage, or Standard coverage) provides a list of subscriptions in each status.. This information allows you to identify the owner of a subscription and contact them in order to enable Security Center or increase the subscription's coverage.

Policy compliance Policy compliance is determined by the compliance factors of all policies assigned..

- Advanced cloud defenses – Reduce threats with just in time access to management ports and adaptive application controls running on your VMs..
- Integrated security solutions - Collect, search, and analyze security data from a variety of sources, including connected partner solutions.. The overall compliance score for a management group, subscription, or workspace is the weighted average of the assignments. [Скачать Игры Disaiples 3](#)

What is Azure Security Center? • • 7 minutes to read • Contributors • • • • In this article Azure Security Center provides unified

security management and advanced threat protection across hybrid cloud workloads.. The built-in dashboard provides instant insights into security alerts and vulnerabilities that require attention.. Azure Security Center allows you to prevent, detect, and respond to security threats with increased visibility.. The weighted average factors in the number of policies in a single assignment and the number of resources the assignment applies to..

- Actionable recommendations – Remediate security vulnerabilities before they can be exploited by attackers with prioritized and actionable security recommendations..

Why use Security Center?

- Centralized policy management – Ensure compliance with company or regulatory security requirements by centrally managing security policies across all your hybrid cloud workloads..

Subscription coverage This section displays the total number of subscriptions you have access to (read or write) and the Security Center coverage level (Standard or Free) a subscription is running under:

- Covered (Standard) – Covered subscriptions are running under the maximum level of protection offered by Security Center
- Covered (Free) – Covered subscriptions are running under the limited, free level of protection offered by Security Center
- Not covered – Subscriptions in this status are not monitored by Security Center

Selecting the chart opens the Coverage window..

- Prioritized alerts and incidents - Focus on the most critical threats first with prioritized security alerts and incidents.
